

Student Research Assistant Offshore Wind O&M (Internship 30-40hrs/week)

Location: Bremen, Germany

Start Date: immediately

Working hours: 20-40h/week, at least 6 months

Department: DWTOC- Business Development

The Company

Deutsche Windtechnik Offshore & Consulting is specialized in the technical maintenance of offshore wind turbines. More than 2.100 employees ensure reliable operation around the clock for more than 6,000 turbines – onshore and offshore, in Europe, Taiwan, and the USA. Within Deutsche Windtechnik AG, we have various subsidiaries with different focuses, e.g., onshore wind, offshore wind, and wind farm technology. Our wind turbine portfolio includes Nordex, Senvion, Fuhrländer, Vestas/NEG Micon, Siemens/AN Bonus, Gamesa, and Enercon. In addition to our full-service offer, we are also available for individual project consultancy and major component exchange jobs.

The Role

You will research, draft reports, and help prepare documents for our business development department. Being a DWT member, you will be learning from our in-house experts and helping clients deliver safe, functional, and best-performed wind farms for the decades to come. As a business development working student or intern, you will be part of a team that develops go-to-market strategies, delivers consulting service, and communicating with our clients. In addition to working closely with your team, you will have the opportunity to interact with other departments within Deutsche Windtechnik AG regularly. Your internship will open new working opportunities after your studies.

Your Profile

- You are currently enrolled in university or almost complete your study (ideally Master or Diploma degrees, studying wind energy systems, energy processes, and technology, engineering, or business engineering) with a strong focus on quantitative and qualitative analysis.
- You have excellent skills in conducting research, compiling information, writing essays, reports, and preparing of illustrations, etc. You are familiar with academic writing standards.
- You are interested in the offshore wind industry and willing to learn.
- You possess excellent MS Office (Word, Excel, PowerPoint, etc.) skills. Basic data analysis skill is desirable.
- You have excellent spoken and written English skills, having German skills is a plus.
- You have strong analysis, decision-making, and critical thinking skills.
- You have excellent time management, organization, and attention to detail.
- You are collaborative and have strong communication skills.

Your Tasks

- You will support the Consulting team and Business Development team in daily operation activities.

- You conduct project-related research and help processing data and content such as texts, charts.
- From scratch, you will help prepare service module presentations by and preparing articles with visualizations based on research or given context. This also includes writing reports, preparing presentations, workshops, kick-off meetings, etc as per client's request.
- You will support the project team with key stakeholders within our partner organizations to generate adoption, renewals, and new information or opportunities.
- You will work with Excel, PowerPoint, SharePoint, and other corporate software.
- You are available at least 20h/week, for at least 6 months. You can start immediately.

Our Offer

- A challenging job in a dynamic corporate environment
- Fun at work in an interesting and forward-looking industry
- Flat hierarchies and short decision-making processes
- A relaxed, modern corporate culture
- Pension subsidies and capital-forming benefits
- Employee discounts for many leisure activities and online shopping
- In addition, company events, accident insurance, carpool insurance, company health insurance, bicycle leasing, company fitness. and much more.
- Individual options for mobile working
